

Lower Village Master Plan Committee

Monday, June 12, 2017

Sea Road School Gymnasium, 71 Sea Road

6:00 pm

1. Attendance
2. Participate in the Public Forum regarding "Help shape the future of Lower Village" (see attached flyer).
3. Adjourn

Help shape the future of Lower Village

The town of Kennebunk, Lower Village Committee and Lower Village Master Plan Committee are about to embark on an exciting new process to help shape the future of Lower Village – and we want YOU to be a part of it.

This process, planned to be complete by the end of the year, will answer these issues:

- Can we improve traffic flow and connectivity?
- Create design standards for businesses that preserve the feel of the area?
- Make the streetscapes safer and more attractive for those living, working and visiting the area?
- Find ways to make Lower Village's personality stand out and shine?

To answer these questions, there will be numerous opportunities for public input, from community-wide meetings to open houses and workshops.

The town will then use the plans developed with public input to seek state monies and other funding sources to make the plan a reality.

The process is being guided by a team from Harriman and Sebago Technics.

For more information, please check out the Lower Village Master Plan Project Facebook page at facebook.com/lowervillageplanning, and sign up for updates through the town website at kennebunkmaine.us/876/Lower-Village-Master-Plan-Project.

First meeting: 6 p.m. Monday, June 12 at Sea Road School
